

Specialist Divisions Open New Purpose-built Facility

PWP Building Services have moved their specialist Fire and Security, Maintenance and Data Services Divisions into a new purpose-built building. Located on the site of their head office in Bestwood Village, Nottingham, it provides PWP with additional space to cope with the increasing demand for their specialist services, while maintaining all their activities in one place.

The facility houses a display of a wide variety of security and communications systems – with examples of the most up-to-date technology and equipment in Fire Alarm and Detection systems, Data Communications, Intruder and Access Management, CCTV and premises monitoring. A fully equipped training and demonstration suite illustrates how different systems can be integrated to provide a comprehensive communications and security network, designed to meet each client's specific needs.

Fire and Security Division achieves NSI/ BAFE accreditation

PWP Fire and Security Division has achieved BAFE accreditation through the NSI (National Security Inspectorate) scheme. Accreditation under the BAFE SP203 modular scheme confirms the Division's expertise in the design, installation, commissioning and maintenance of Fire Alarm and Detection systems.

A PWP spokesperson commented: "BAFE accreditation provides our clients with further confidence and reassurance of our commitment and ability to deliver the highest standards of service and performance, confirmed by an independent organisation."

PWP delivers first class Building Services package for DPD's giant new Midlands hub

PWP Building Services has completed a Design and Build contract to install Mechanical, Electrical and Data Management Services in a new 13,200m² (150,000ft²) plan hub distribution facility for DPD (formerly known as Parceline) in Oldbury, West Midlands. The 320m (1,213ft) long building includes extensive mezzanines, offices, staff amenities and 6,500m²

(70,000ft²) of underground parking. The site also includes a separate office, security and canteen building, a vehicle maintenance facility and extensive external services.

Working closely with long-term partner DPD (Dynamic Parcel Distribution), PWP designed and installed heating, lighting and power services for the centre's full range of equipment and facilities including handling and sortation systems. They included the integration of a site 3.5MVA electrical supply, two 1.5MVA standby generators and the installation of specialist data and car park ventilation.

Site works commence on £5.75M M&E services contract for North Leamington School Warwickshire

Following the highly successful completion of the New Avon Valley School at Rugby, Warwickshire County Council in conjunction with Miller Construction (Midlands) have awarded the Mechanical, Electrical and Specialist Services Package for the new North Leamington School to PWP Building Services.

Prior to site commencement PWP worked closely with Miller, Turner and Townsend and consultants Scott Wilson to ensure surety of cost and best value was achieved.

The project includes three teaching blocks, a main hub building incorporating kitchen/restaurant, music and dance facilities along with a main hall and a separate sports building incorporating main plantroom.

PWP are providing the full suite of services including specialist CCTV, fire engineering, intruder, access control and data services from their in-house divisions.

The services on site installation commenced June 2008 and will be completed June 2009.
