### THE CLIENT

Nottingham City Council

### PROJECT

PWP Fire and Security Division designed, supplied and commissioned a £125,000 upgrade to the existing fire alarm system in the Council House, Exchange Buildings and Shopping Complex in the Old Market Square, Nottingham.

### SERVICES PROVIDED

The installation incorporated Gent 6 loop 'Vigilon' control panels, additional fire alarm equipment and a 3<sup>rd</sup> party networked wireless fire alarm. More than 400 devices were installed, both wireless and hard wired.

The Shopping Complex installation has additional features suited to a retail environment, including verification features to reduce false alarms, while maintaining full communication with all parts of the system.

Being a site of historical importance, PWP worked closely with Heritage personnel to ensure that cabling, positioning of equipment and other aspects of the project do not unduly impact on the architecture and appearance of the buildings.

### OTHER CONTRACTORS

Main FA equipment manufacturer -  
Gent by Honeywell

Wireless FA equipment manufacturer -  
EMS
