About PWP

PWP Fire & Security have been established for over twenty years and gained a strong reputation for outstanding technical excellence, flexibility, and integrity. The company today retains its original enthusiasm and commitment to customer satisfaction across all their areas of expertise: fire detection & alarm, fire suppression, intruder alarms, access control & cctv.

Due to continued growth and our commitment to the highest standards of installation, service and support we require an additional **INSTALLATION & COMMISSIONING ENGINEER** with previous hands-on technical experience to play a key role in ensuring our standards are maintained, and to contribute to the ongoing development of the business along with opportunities to develop and progress for the right individual.

Roles and Responsibilities:

- Carry out installation & commissioning works to support the delivery of projects and small works.
- Completion of clear & accurate work reports and commissioning certificates.
- Good problem-solving skills, fault-finding skills, and analytical thinking.
- Customer focused and the ability to resolve customer queries.
- Provide a high level of customer service to clients and maintain the highest standards of quality.
- Carry out site surveys to assist with small works quotations.

Skills Requirements:

- Good technical knowledge of networked fire alarm systems.
- Experience working with Gent, Advanced, Ziton and Aspirating Systems (Vesda, FFAST, Securiton).
- Knowledge of BS5839 and BAFE is essential.
- FIA qualifications (FIA Units or Foundation route).
- Conversant with regulations and standards in relation to cable installations.
- Time management and organisational skills.
- Able to work under pressure and be flexible to achieve deadlines.
- Confident and determined individual who can work as part of a team and as an individual under their own initiative.
- Full UK driving license.
- Knowledge of Suppression Systems would be advantageous.
