continually building on success
Project Profile

MARKS & SPENCER PLC

PWP have completed a distribution centre fit-out for one of the most well known brands in the UK, Marks and Spencer PLC. The project, valued at £3.2m, involved a total M&E design and build services fit-out of two, linked logistics facilities at Sheffield International Rail and Freight Terminal (SIRFT) totalling 647,000 sq ft (60,130m²).

This fast track design and installation of the warehouse and offices was completed ahead of schedule, resulting in significant savings for Marks and Spencer.

PWP tendered and were successful in providing ‘a compliant and best value’ bid for M&E and Security installations.

“Throughout the process they remained flexible in their approach and worked with us to value engineer the solution and identify saving opportunities whilst still providing high standard installations fit for purpose. Their flexible, helpful approach enabled us to deliver a challenging project on time and within budget.

M&S would be pleased to recommend the services of PWP and will have no hesitation in engaging with them again when the opportunity arises.”

Nigel Bayes, BAU Manager, Capital and Infrastructure, Marks and Spencer

There are a range of environmentally sustainable initiatives included in M&S’ distribution centre which has created around 300 jobs. The units benefit from two 420 metre rail sidings to the rear, allowing multi modal freight movements and have allowed the retailer to fulfil its supply chain objectives.

About Marks & Spencer PLC

Founded in 1884, M&S has grown from a single market stall to an international, multi-channel retailer. They pride themselves on selling stylish, high quality, great value clothing and home products, as well as outstanding quality food, responsibly sourced from around 3,000 suppliers globally.

About PWP

PWP Building Services specialise in design & build contracts and have established a strong reputation for outstanding technical excellence, flexibility, and integrity over the last twenty years. Still proudly managed by its founders, the company today retains its original enthusiasm and commitment to customer satisfaction across all of their areas of expertise: heating & ventilation, plumbing, electrical systems, fire & security and data systems.
